

EcoMultiMix

Extremely suitable for young horses in growth, sport horses and older and/or horses that need to gain weight. A horse will eat more slowly when you mix the roughage with the pellets and or mueslis; they chew their food better and produce more saliva, which ensures better digestion and absorption of nutrients. The addition of corn & barley flakes is an extra source of energy and slow sugars. This eliminates the imbalanced calcium/phosphorus ratio present in alfalfa. This ratio is very important for the absorption of magnesium, which ensures flexible muscle mass.

USP's

- Great fiber source for mixing with pellets and/or mueslis
- Source of protein and slow energy
- Gives horses more mass

Daily feeding advice

- Ca. 250 grams per feeding benefits the positively active ingredients, saliva production and better utilization of the concentrate.
- From approximately 1 kilo per feeding, the protein-rich mix benefits mass and muscle building.
- Feed ca. 50-600 grams per 100 kilos of body weight.

Ingrediënts

Sundried alfalfa	Corn flakes	Beet molasses
Chopped straw	Barley flakes	

Our products are GMP+ FSA certified.

EAN Code 8721082364041
 Volume bale ca. 15kg
 Bags per pallet 45 pieces
 Size pallet 100x120cm
